TYPICAL INSTALLATION

1. Pop-up nozzles are placed in floors, steps, benches and spas to clean the entire pool
2. Pop-up nozzles work together to sweep debris to the pool's main drain and skimmer area
3. Optional MDX Debris Removal System with anti-entrapment technology removes large debris
4. Optional debris cansiter collects large debris for conventional disposal
5. Cycleclean automatic water valve functions as the brain of the system and directs a powerful flow of water to each set of cleaning nozzles
